

## e-CERISE online course

(online - Continuing Education for VeterINARY Services)

**Date:** January 2020 – november 2020

**Deadline for registration:** September 15, 2019

**Postgraduate program:** Diploma of continuing education institution in Veterinary Public Health Policy and Quality of Veterinary Services.

**Duration:** Three non-consecutive one-day sessions per month for 10 months (workload of 230-250 hours)

**Location:** Online course and one-week face-to-face session in March at ENSV (Marcy l'Etoile, France)

**Target audience:** Official Veterinarians from countries that have committed to the OIE PVS Pathway wishing to acquire additional skills and to progress in their functions and responsibilities.

### General Organisation:

Vincent BRIOUDES, ENSV  
[vincent.brioudes@ensv.vetagro-sup.fr](mailto:vincent.brioudes@ensv.vetagro-sup.fr)  
Ariane CHAMOIN, ENSV  
[ariane.chamoine@ensv.vetagro-sup.fr](mailto:ariane.chamoine@ensv.vetagro-sup.fr)

### Technical Coordination and speakers:

Professors from France's four veterinary schools, the Faculty of Veterinary Medicine of the University of Montreal (Saint-Hyacinthe campus), and the Ecole Inter-Etats des Sciences et Médecine Vétérinaire de Dakar (EISMV). Experts on the PVS pathway and OIE standards.

**Language of Instruction:** French/English

### Registration:

ENSV website at <http://www.ensv.fr/ecerise-registration-form/>

### Tuition fees:

€8,000 (includes one-week session in France)

(Need-based scholarships are available – please contact us if you want to apply)

### "Implementing OIE recommendations to improve performance in Veterinary Services: case studies, experience exchange, personalised tools, and practical measures"

#### Context and description of the course:

**Type:** Online capacity-building program for the training of Official Veterinarians, created by ENSV within the network of OIE Collaborating Centres, in association with the EISMV (Dakar, Senegal) and the Faculty of Veterinary Medicine of the University of Montreal (Saint-Hyacinthe, Canada).

**Main objective:** At the end of the course, the participants will have the knowledge and skills necessary to actively participate in the design, implementation, evaluation, and coordination of veterinary public-health policies. They will understand how to implement OIE recommendations for their home countries.

The content of the course will be adapted, on a case-by-case basis, to the local situation for each participant's home country and to the strategy designed for that country as a result of the PVS Gap Analysis.

**Relevance:** This online training course has been developed to complement two major strategic activities of the OIE:

- The OIE PVS Tool (Evaluation of Performance of Veterinary Services). The majority of the PVS critical competencies are addressed in the 10 training modules. This online training program will further the objectives of the OIE PVS Pathway with regard to the strengthening of Veterinary Services.

- The training of OIE Focal Points. When possible and relevant, veterinary officials expecting to serve as OIE Focal Points should complete this online course before attending the face-to-face training seminars currently offered by OIE headquarters. Each of the course's 10 training modules will provide prerequisite skills and fundamental knowledge that will enhance subsequent participation in training sessions for OIE Focal Points.

**Prerequisites:** an advanced degree in the veterinary sciences and 3 to 5 years of relevant professional work experience.

#### Module Topics 2020

- Registration on the training platform – Introduction
- Sanitary Standards for International Trade
- Emergency Risk Management
- Project Management (Face-to-Face session)
- Quality of Veterinary Services
- Risk Analysis
- Epidemiological Surveillance
- Disease Prevention, Control and Eradication
- Veterinary Products and antimicrobial Resistance
- Food Safety
- Animal Welfare
- Inspection of Fisheries and Fresh Water Products
- Human-animal-environment relationships
